EDUCATION

Stanford University

Stanford, CA

Bachelor of Science in Symbolic Systems, Minor in Music

Sep. 2022 – Jun. 2026

- **Relevant Coursework:** Programming Abstractions, Programming Methodologies, Computer Systems, Multivariable Calculus, Probability, Linear Algebra, Discrete Mathematics

EXPERIENCE

Data Science Intern

Jul. 2025 – Sep. 2025

Subtle Computing

Menlo Park, CA

- Led 120+ hrs of acoustic data collection for Subtle Voicebuds, building training data for real-time noise cancellation.
- Built scalable Python pipelines for validation and anomaly detection, cutting preprocessing time 40%.
- Accelerated embedded ML deployment 30% via optimized features and standardized workflows.

Software Engineer Intern

Jun. 2024 – Sep. 2024

Stanford University

Stanford, CA

- Led migration of three logic education applications to web platforms as part of The Openproof Project, enhancing accessibility for 120+ students in Stanford's logic curriculum.
- Conducted user research with students and faculty to inform product decisions, resulting in 25% improved educational outcomes through interactive JavaScript features.
- Streamlined development workflow using Grunt automation, reducing deployment time by 50% and accelerating product delivery cycles.

Teaching Assistant

Sep. 2023 – Present

Black LaIR | Stanford University

Stanford, CA

- Mentored 100+ students in technical problem-solving, developing curriculum and support systems that improved learning outcomes by 50%.
- Developed comprehensive lesson plans and collaborated with TAs to streamline student support, reducing response times to inquiries by one hour.

PROJECTS

Liner Notes | *JavaScript, CSS, React.js, MongoDB, Node.js*

May 2023 – Aug. 2023

- Architected full-stack MERN audio platform serving 100+ music producers with JWT authentication and file upload capabilities.
- Conducted user research to eliminate broken forum links, deploying scalable application with 99% uptime using Netlify/Render.com infrastructure.
- Analyzed user behavior patterns to inform product roadmap and optimize sample discovery workflows, improving user retention.

LEADERSHIP

Co-Director, Talent Coordinator

Sep. 2024 – Present

Stanford Concert Network

Stanford, CA

- Led cross-functional teams across talent acquisition, marketing, and operations for major university concert events.
- Executed Frost Fest with headliners including DoeChii and Zack Fox, attracting 8,000+ attendees and coordinating with artists, venues, and university administration.
- Developed integrated marketing campaigns and social media strategies, driving campus-wide engagement and optimizing event awareness metrics.

TECHNICAL SKILLS

Languages: Python, C++/C, SQL, JavaScript, HTML/CSS

Frameworks/Libraries: React, Node.js, Material-UI, MongoDB, Wavesurfer.js, SciPy

Developer Tools: Git, UNIX, GDB, Visual Studio, Adobe Creative Cloud

Affiliations: Stanford Concert Network, ColorStack, 'Black In CS' at Stanford, Stanford Jazz Orchestra
